

GIANCARLOS GONZALEZ

FULL STACK WEB DEVELOPER

[GitHub](#) | [Web Portfolio](#) | [Email](#) | [LinkedIn](#) | [WhatsApp](#)

SUMMARY

Full-Stack Web Developer with experience building production-oriented web applications using Django, FastAPI, TypeScript, React and Next.js. Strong focus on clean architecture, API development, testing, PostgreSQL, Docker, and maintainable code. Comfortable working in remote environments and collaborating through clear documentation and strong problem-solving.

TECHNICAL SKILLS

Backend:

- [Python](#)
- [Django](#) / DRF
- [FastAPI](#)

Frontend:

- [JavaScript](#) / [TypeScript](#)
- [Tailwind](#) / Bootstrap
- [React](#) / [Next.js](#)

Data:

- Postgres / MySQL
- DepOps:**
- [Docker](#) / CI | CD

Testing:

- Pytest / Vitest / Playwright

Tools:

- [Git](#) / [Github](#)

PROJECTS

Frontend - PURO DOCE Website

Jun 2026 - Present

- Built a responsive confectionery website with Next.js, featuring a structured product catalog, pricing, section navigation, promotional content, and clear ordering paths through WhatsApp and delivery apps.
- Created a Portuguese-language experience for customers across Curitiba, with mobile-friendly navigation and reusable content sections, then deployed the production site on Vercel.
- [Website](#)

Full Stack - FastAPI Ecosystem Lab

Mar 2026 - Present

- Built a FastAPI-based full-stack lab covering routing, dependencies, middleware, PostgreSQL, SQLAlchemy, Alembic migrations, JWT/OAuth2 authentication, testing with pytest/httpx, Docker deployment, and a Next.js/TypeScript frontend.
- Developed a production-style learning repository with backend guides, frontend modules, and local orchestration using Docker Compose for API, database, and frontend components.

Full Stack - Django E-commerce Platform

Jan 2025 - Jan 2026

- Built a full-featured Django e-commerce application with user authentication, product catalog, shopping cart functionality, order workflow, and secure payment processing.
- Implemented PostgreSQL integration, automated testing, Docker containerization, and code-quality tooling with Ruff and pre-commit hooks, while delivering a responsive mobile-friendly interface.
- Links: [Github](#) | [Website](#).

EDUCATION

High School Diploma - IPU Eduardo Garcia Delgado Jan 2018 - Jun 2021

- Relevant coursework in programming, mathematics and design.
- Participation in informatic competitions that have posed great challenges to develop my skills as a programmer.
